

Let's Design A New School Garden!

Projects are due to Principal Michelle Clements by March 10.
The winning design will be built this Spring & publically announced!

Step 1: Pick your plants. Use your plant science skills to decide which plants will grow best in your school's garden.

Step 2: Design your garden. Pick up a pencil and graph paper to start drawing your garden's design. Be as creative as you want!

Step 3: Build your 3D model. Follow the engineering design process, build a model of your garden. Visualize your potential, and submit your design!
